Box III TEXT OF THE ABSTRACT (Continuation of item 5 of the first sheet)

The device and procedure for welding and cutting plastic film comprises welding means (9) and first holding means (3) between which means for cutting (4) said plastic film (5) is arranged. The device comprises second holding means (9) arranged on the opposite side to said first holding means (3) with respect to said cutting means (4), so as to hold said plastic film uniformly laid out during cutting. The procedure for welding and cutting plastic films laid on top of each other consists of locking said films between first (3) and second (7) holding means defining a portion of the films upon which to carry out the cutting, of welding said films in a position outside of said portion and of cutting said films at the previously defined portion.
